INDEX.

Agricultural Discourse, by John Davy, M.D., F.R.S., &c., 288.
Alps, their geology, by M. Fournet, 94.
Arago, account of Melloni's Theory of Dew, 128.
Arsenic in mineral waters, 187.
Auvergne, on its palæontology, by M. Pomel, 6.—Age of its volcanoes, as determined by the remains of quadrupeds, by C. Lyell, Esq., F.R.S., 50.
Atmospheric pressure under different latitudes, 399.

Baikal Lake, observations on, 186.
Barry, Martin, M.D., on the nucleus of the animal and vegetable cell, 201.
Bischof, Professor, on a new system of Geology, 304.
Buch, Baron, on glaciers, 396.

Cameos, shell, 191.
Chiolite, a new mineral from Miask, described, 187.
Connell, Professor, account of a sulphato-chloride of copper, 243.
Corals obtained from great depths in the Antarctic Ocean, observations on, 258.

Dana, James D., on the volcanoes of the moon, 10.—On the origin of continents, 234.—On the geographical distribution of zoophytes, 41.
Davy, John, M.D., on the mineral water of the baths of Nevis, in the West Indies, 1.—His agricultural discourse, 288.
—— On the precipitation of one earth or metallic oxide by another from saline solutions, 229.
Desor, M., on the relations which exist between the phenomena of erratic blocks in northern Europe and the elevations of Scandinavia, 141.—On the occurrence of stones on the surface of glaciers, as connected with glacier stratification, 172.
Dew, theory of, by M. Melloni, 128.
Drift-Furrows, apparent, 184.
Dodo, on the remains of, in the Museum of Copenhagen, 405.

XUM

Edmonds, Richard, jun., on the origin of the sand-hillocks of St Ives Bay, &c., 181.
Erratic phenomena of Scandinavia, as explained by Durocher and Martins, 109.
Ethnology, on its relations to other branches of knowledge, by Dr Prichard, F.R.S., Corresponding Member of the Institute of France, 307.

Francis, Captain William, on the high temperature of the water at the United Mines, 102.
Fournet, M., his series of researches on the geology of that part of the Alps lying within the Valais and Oisans, 94.
Fox, Robert Were, some remarks on the high temperature in the United Mines, 99.
Funguses, esculent, of England, 408.

Geology, new, by Professor Bischof of Bonn, 304.
Geology of the Alps, by M. Fournet, 94.
Geyser springs of Iceland, their temperature, 179.
Glacier-ice, and glacier-water, their colour, by M. Ch. Martins, 85.
Glaciers of Chamonix, their ancient extent, 54.—Glaciers, on their motion, by M. Ch. Martins, 336.—Glacier water, its colour, by M. Edmond Collomb, 337.—Baron von Buch on glaciers, 396.

Hawaiian nation, its origin, 45.
Hybrid animals and plants, account of, by S. George Morton, M.D., 262.

Insects, on their commercial value, 407.

Land, imaginary, 400.
Lyell, Ch., F.R.S., &c., on the age of the volcanoes of Auvergne, 50.

Marine invertebrata, found at great depths in the ocean, 403.
Metamorphoses of the Ophiuræ and Echini, by M. Muller, 404.
Manna of the Scriptures, 176.
Martins, Ch., on the erratic phenomena of Scandinavia, in reference to M. Durocher's Memoir on that subject, 109.
——— on the ancient extent of the glaciers of Chamonix, from Mont Blanc to the Jura, 54.

Martins, Ch., on the colour of the ice of glaciers, and that of the waters which flow from them, 85.

Mastodon, food of, 185.

Meikle, H., on the theory of parallel lines, 255.

Melloni, M., on the theory of dew, 128.

Milne, David, Esq. F.R.S.E., on the parallel roads of Glen Roy, with remarks on the change of relative levels of sea and land in Scotland, 339.

Mineral water of the baths of Nevis in the West Indies, 1.

Mines, temperature, of, 99, 102.

Moon, volcanoes of, described by J. D. Dana, 10.

Morton, George, M.D., on the hybridity of animals and plants, considered in reference to the question of the unity of the human species, 232.

Mulder, Professor, on the protein question, 162.

Murchison, R. I., brief review of the classification of the sedimentary rocks of Cornwall, 33.—On the meaning originally attached to the term "*Cambrian System*," and on the evidence since obtained of its being geologically synonymous with the previously established term "*Lower Silurian*," 147.

Nitrification, observations on, 187.

Ocean, temperature of its greatest known depth, 402.

Pain, on its beneficial distribution, by Mr G. A. Rowell, 385.

Parallel lines, the theory of, by H. Meikle, Esq., 255.

Patents granted for Scotland, from 22d March to 21st September 1847, 195, 408.

Peruvian bark, collecting of, 190.

Phosphate of lime in organic beings, 187.

Pomel, A. on the palæontology of Auvergne, 6.

Prichard, J. C., M.D., F.R.S., on Ethnology, 307.

Protein question considered, by Professor Mulder, 162.

Publications, New, 193, 408.

Quinua, or Chenopodium quinoa, as a partial substitute for potato, 189.

Rocks, pyrogenous, and their accessory elements, 395.

Sea, its low temperature over sand-banks, 402.

Secular variation of the relative level of the sea and land, 397.

Sedimentary rocks of Cornwall, observations on, by Sir Roderick Impey Murchison, 33.
Separation of silica from plants, 189.
Shell cameos, observations on, 191.
Smelting by electricity, 192.
Society of Arts of Scotland, prizes offered by, for 1847–8, 198.
Stereochromy, observations on, 193.
Storms in the southern hemisphere, 106.
Stokes, Charles, Esq., F.R.S., &c., remarks on some corals obtained from great depths in the Antarctic Ocean, contained in a letter to Captain Sir James C. Ross, R.N., &c., 258.
Sulphato-chloride of copper analysed, by Professor Connell, 243.

Tea, important information regarding its cultivation in the valley of the Dhoon, in N. W. India, 170.
Trade-winds and hurricanes, observations on, by Robert Lawson, Esq., 364.
Turkey-buzzard, or John-crow vulture, account of, 90.

Vampire bats, account of, 188.
Vapour, plane of, in the atmosphere, its height, 400.
Volcanoes, active, in the arctic and antarctic regions, 398.

Water, its colour, considered, 88.
Waves, height of, 403.
Wilson, George, M.D., lecturer on chemistry in Edinburgh, on the decomposition of water, by platinum, and the black oxide of iron at a white heat, 244.
Winters, mild, in England, 401.

Zoophytes, their geographical distribution, 41.

END OF VOLUME FORTY-THREE.

EDINBURGH:
PRINTED BY NEILL AND COMPANY, OLD FISHMARKET.

CONTENTS.

PAGE

Art. I. On the Mineral Water of the Baths of Nevis, in the West Indies; in a Letter addressed to Professor Jameson, by John Davy, M.D., F.R.S., London and Edinburgh, Inspector-General of Army Hospitals, ... 1

II. New Considerations on the Palæontology of Auvergne. By A. Pomel, ... 6

III. On the Volcanoes of the Moon. By James D. Dana, 10

IV. A brief Review of the Classification of the Sedimentary Rocks of Cornwall. By Sir Roderick Impey Murchison, G.C., St S., F.R.S., V.P.G.S. & R. Geogr. S., &c. &c. (In a Letter, addressed Sir C. Lemon, Bt., M.P.) Communicated for the Journal by the Author, ... 33

V. Geographical Distribution of Zoophytes. By James D. Dana, ... 41

VI. Origin of the Hawaiian Nation, ... 45

VII. On the Age of the Volcanoes of Auvergne, as determined by the Remains of successive Groups of Land Quadrupeds. By C. Lyell, Esq., F.R.S., &c., ... 50

XUM

PAGE

VIII. On the Ancient Extent of the Glaciers of Chamonix, from Mount Blanc to the Jura. By M. Ch. Martins, ... 54

1. Of existing Glaciers, ... 57
2. Rocks polished and striated by existing Glaciers, . 62
3. Moraines and Erratic Blocks of existing Glaciers, . 64
4. Pebbles striated by existing Glaciers, . . 66
5. Of the ancient Extension of the Glaciers of Mont Blanc from Chamonix to Geneva, . . . 69
6. Of the Climate of the Glacial epoch, . . 82

IX. On the Colour of the Ice of Glaciers, and that of the Waters which flow from them. By M. Ch. Martins, ... 85

X. On the Colour of Water, ... 88

XI. John-Crow Vulture, (*Turkey-buzzard*, Wilson; *Cathartes aura*, *Vulture aura*, Linn; *Carthartes aura*, Illiger,) 90

XII. Series of Researches on the Geology of that part of the Alps lying between the Valais and Oisans. By M. Fournet, ... 94

XIII. Some Remarks on the High Temperature in the United Mines. By Robert Were Fox, . 99

XIV. On the High Temperature of the Water at the United Mines. By Captain W. Francis, . . 102

XV. Storms in the Southern Hemisphere, . . 106

XVI. On the Erratic Phenomena of Scandinavia, in reference to M. Durocher's Memoir on that subject. By M. Ch. Martins, ... 109

Direction of the Striæ, ... 110
Characters of the Transported Deposits in the North of Europe, ... 115
Reply to M. Durocher's Objection to the idea of the Ancient Extension of the Glaciers of Scandinavia, . 119
Reply to the Objections to the Ancient Extension of Glaciers among the Alps, ... 125

PAGE

XVII. On the Theory of Dew. By M. Melloni; in Two Letters to M. Arago, ... 128

XVIII. On the Relations which exist between the Phenomena of Erratic Blocks in Northern Europe and the Elevations of Scandinavia. By M. Desor, . 141

XIX. On the Meaning originally attached to the term "Cambrian System," and on the evidence since obtained of its being geologically synonymous with the previously established term "Lower Silurian." By Sir Roderick I. Murchison, G.C. St S., V.P.G.S., F.R.S., &c., ... 147

XX. On the Protein Question. By Professor Mulder of Utrecht. Communicated by Professor J. F. W. Johnston, ... 162

XXI. Important Information regarding the Cultivation of Tea in the Valley of the Dhoon, India, . 170

XXII. On the Occurrence of Stones on the surface of Glaciers, as connected with Glacier Stratification. In a Letter to Professor Jameson by M. E. Desor, 172

XXIII. On the Manna of the Scriptures, . . . 176

XXIV. On the Temperature of the Geyser Springs in Iceland, ... 179

XXV. On the Origin of the Sand-hillocks of St Ives Bay, Whitesand Bay, and Mount's Bay. By Richard Edmonds, jun., Esq., ... 181

XXVI. Scientific Intelligence:—

GEOLOGY AND MINERALOGY.

1. Example of apparent Drift-Furrows dependent on Structure. By C. B. Adams, State Geologist of Vermont, &c. (Communicated for this Journal.) 2. Food of the Mastodon. (Proc. Bost. Nat. Hist. Soc.) 3. Large Plates of Mica. 4. Lake Baikal. 5. Chiolite,

a new mineral from Miask; By Fr. v. Wörth. 6. Arsenic in Mineral Waters. 7. Nitrification. 8. Phosphate of Lime in Organic Beings, 184–187

ZOOLOGY.

9. Vampire Bats, ... 188

BOTANY.

10. Quinua, or Chenopodium Quinoa, as a partial substitute for the Potato. 11. Separation of Silica from Plants. 12. Collecting of Peruvian Bark. 189-190

ARTS.

13. On Shell Cameos. 14. Smelting by Electricity. 15. Stereochromy, ... 191-193

XXVII. New Publications received, ... 193

XXVIII. List of Patents granted for Scotland from 22d March to 22d June 1847, ... 195

List of Prizes offered by the Royal Scottish Society of Arts for 1847–8, ... 198

CONTENTS.

PAGE

ART. I. On the Nucleus of the Animal and Vegetable "Cell." By MARTIN BARRY, M.D., F.R.S., London and Edinburgh, Member of the Wernerian Natural History Society, &c. With Two Plates. Communicated by the Author, ... 201

II. On the Precipitation of one Earth or Metallic Oxide by another from Saline Solutions. By JOHN DAVY, M.D., F.R.S., London and Edinburgh, Inspector-General of Army Hospitals. Communicated by the Author, ... 229

III. On the Origin of Continents. By JAMES D. DANA, 234

IV. On Sulphato-Chloride of Copper, a new Mineral. By ARTHUR CONNELL, Esq., Professor of Chemistry in the University of St Andrews. Communicated by the Author, ... 243

V. On the Decomposition of Water by Platinum and the Black Oxide of Iron at a white heat, with some observations on the theory of Mr Grove's Experiments. By GEORGE WILSON, M.D., Lecturer on Chemistry in Edinburgh. Communicated by the Royal Scottish Society of Arts, ... 244

PAGE

VI. On the Theory of Parallel Lines. By Henry Meikle, Esq. Communicated by the Author, . . 255

VII. Remarks on some Corals obtained from great depths in the Antarctic Ocean, in a Letter from Charles Stokes, Esq., F.R.S., F.G.S., &c., to Captain Sir James C. Ross, R.N., ... 258

VIII. Hybridity in Animals and Plants, considered in reference to the question of the Unity of the Human Species. By Samuel George Morton, M.D., Author of "Crania Americana," "Crania Ægyptiaca," &c.:—

Part I. Mammalia.—Introductory Remarks, . . 262
Part II. Birds, ... 276
Part III. Reptiles, Fishes, Mollusca, and Insects, . 282
Part IV. Plants, ... 284
Remarks, ... 286
Conclusions, ... 288

IX. Agricultural Discourse. By John Davy, M.D., F.R.S., Inspector-General of Army Hospitals, Honorary Member of the General Agricultural Society of Barbadoes. Read at their Third Half-Yearly Meeting in 1847, ... 288

X. On the Foundation of a New Geology. By Professor G. Bischof of Bonn, ... 304

XI. On the Relations of Ethnology to other Branches of Knowledge. By J. C. Prichard, M.D., F.R.S., Corresponding Member of the Institute of France, &c. &c., &c. Communicated by the Ethnological Society, ... 307

XII. On the Motion of Glaciers. By M. Ch. Martins, in a Letter to Professor Jameson, Editor of the Edinburgh New Philosophical Journal, . 336

PAGE

XIII. On the Colour of the Water of Glaciers. By M. Ed. Collomb, ... 337

XIV. On the Parallel Roads of Lochaber, with Remarks on the Change of Relative Levels of Sea and Land in Scotland. By David Milne, Esq., F.R.S E., Member of the Wernerian Natural History Society; of the Geological Society of London, &c. &c., ... 339

XV. Remarks on the Trade-Winds and other Currents in the Atmosphere, at Barbadoes; with an Attempt to Develop the Causes of Hurricanes in the West Indies. By Robert Lawson, Assistant-Surgeon, 47th Regiment. Communicated by the Royal Scottish Society of Arts. (Continued from Vol. xxxix., p. 154.)

Part II.—The Causes of Hurricanes, ... 364

XVI. On the Beneficent Distribution of the Sense of Pain. By G. A. Rowell. Communicated by the Author, ... 385

XVII. Scientific Intelligence:—

GEOLOGY.

1. On the Accessory Elements of Pyrogenous Rocks, by M. J. Durocher. 2. Baron Von Buch on Glaciers. 3. Mark cut on a rock cliff at the mean level of the Sea, with the view of determining the Secular Variation of the relative level of the Sea and Land. 4. Active Volcanoes in the Arctic and Antarctic regions, ... 395-398

METEOROLOGY.

5. Atmospheric Pressure under Different Latitudes. 6. Height of the plane of Vapour in the Atmosphere, and different directions of superincumbent Streams of Air. 7. Imaginary Land. 8. Mild Winters in England, ... 399-401

PAGE

HYDROGRAPHY.

9. Temperature of the Ocean. 10. Low Temperature of the Sea over Sand Banks. 11. Greatest ascertained Depth of the Ocean. 12. Height of Waves, 402-403

ZOOLOGY.

13. Marine Invertebrata found at great depths in the Ocean. 14. On the larva state and metamorphoses of the Ophiuræ and Echini. 15. On the Cranium of the Dodo in the Museum of Copenhagen. By M. Hamel. 16. Commercial value of Insects, 403-407

BOTANY.

17. Esculent Funguses of England, ... 408

XVIII. New Publications received, ... 408

XIX. List of Patents granted for Scotland from 21st June to 21st September 1847, ... 409

NOTICE.

Mr Miller's account of a New Pyrometer, delayed on account of tardiness on the part of the engraver, will appear in our next.
